WELCOME TO OUR FARM.

We have been on this land in the hills of Barren County, KY since 1976 and have been making cheese with our own cows milk since 1998. We invite you to take a look around, see what we are all about, check out our online shop, and perhaps plan your next visit to our farm. We want to know about you too, so come and see us!

We make several styles of cheese on our farm, from the classic Cheddar and Gouda we started with, to some more unique signature varieties that are getting us some attention outside of our local market. Whatever cheeses you grew up on, chances are we make a version of it that will satisfy that childhood craving. If you are looking for something new and different, we can provide that too. Once you try them all, consider yourself an expert!
